**BM ALS - Axle Load Simulation**

The BM ALS - axle load simulation is easily installed or retrofitted to the sides of the subframes of the heavy vehicle brake testers: **BM12200** and **BM14200**.

This system features a range of options that allows for a customized configuration.

**OPTIONS**

See also other BM load simulation systems: **BM CLS - Type A**, **BM CLS - Type D** and **BM74000**.

**Applications**

- Workshops with low vehicle throughput due to the relatively time-consuming process of use.
